# WELDING FUME SOLUTIONS THE NEW STATUS QUO

Weldclass

Welding fume is a serious, carcinogenic health risk, and compliance is now every employer's legal responsibility. The Workplace Exposure Standard (WES) has been slashed from 5 mg/m<sup>3</sup> to 1 mg/m<sup>3</sup>, requiring protection for anyone near welding activities, including welders, supervisors, and visitors.

To secure your site, you must assess, monitor, and control using personal air monitoring to deploy the right engineering and PPE solutions. Invest in compliant fume controls today to protect your people and future-proof your business.
